

DIPJYOTI DAS

+91-7577033248 — dipexplorerid23@gmail.com — linkedin.com/in/dip-jyoti22 — github.com/dipexplorer — Guwahati, Assam

EDUCATION

Gauhati University

2024 – 2027

B.Tech in Computer Science (Lateral Entry) | SGPA: 8.5

Guwahati, Assam

Assam Engineering Institute

2021 – 2024

Diploma in Computer Engineering | CGPA: 8.5

Guwahati, Assam

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: HTML/CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, WebSockets (Socket.io)

Databases & Cloud: MongoDB, PostgreSQL (PostGIS), Supabase, Firebase (Firestore), Redis, TimescaleDB

Tools & DevOps: Git, GitHub Actions (CI/CD), Docker, Celery, Postman, Jest

EXPERIENCE

Assam Power Distribution Company Limited (APDCL)

Jun 2026 – Present

Summer Software Engineer Intern

Guwahati, Assam

- Developing **GridMind**, an asset monitoring system processing time-series telemetry data with FastAPI, Celery, and Redis.
- Logging power grid metrics in TimescaleDB and mapping transformer locations utilizing PostgreSQL/PostGIS.

GirlScript Summer of Code (GSSoC)

May 2025 – Present

Project Creator & Admin (SahiDawa & LegalHub)

Remote

- Leading open-source project governance for **SahiDawa** (GSSoC 2026) managing **244 contributors** and orchestrating the merge of **1375+ PRs** across the repository ecosystem.
- Administered **LegalHub** (GSSoC 2025), managing code reviews and releases for **31 contributors** while ranking #53 on the global contributor leaderboard.
- Enforcing code quality, testing suites (Jest), Git workflow conventions, and branching policies across all administrative repositories.

GSSoC Extended 2024 & Hacktoberfest

Oct 2024 – Nov 2024

Open Source Contributor – Ranked 27th Globally

Remote

- Ranked **27th globally** on the GSSoC Extended contributor leaderboard; merged **83+ PRs** resolving critical memory leaks and optimizing backend aggregation pipelines.
- Earned Hacktoberfest SuperContributor badge for fast-approved core code contributions.

PROJECTS

SahiDawa – Open-Source Citizen Medicine Verifier (Ongoing) [Live] [GitHub]

Next.js 15, FastAPI, PostgreSQL, Supabase, TensorFlow Lite, Whisper ASR, Docker

- Built an offline-first PWA medicine verification platform helping citizens identify counterfeit drugs using OCR and ML-powered image analysis.
- Implemented multilingual voice search using Whisper ASR and semantic medicine retrieval with pgvector.
- Designed scalable architecture using Next.js, FastAPI, Supabase, and Docker supporting 244 GSSoC contributors.

GridMind – Smart Electrical Grid Health Prediction (Ongoing) [Live] [GitHub]

FastAPI, PostgreSQL, PostGIS, TimescaleDB, Celery, Redis, Docker, Deck.gl

- Developed a telemetry web platform integrating machine learning to predict transformer degradation and load-induced failure risks using historical asset loads.
- Built asynchronous data pipelines with Celery, Redis, and TimescaleDB for processing grid telemetry data.
- Mapped physical grid assets and plotted localized load risk overlays dynamically using PostGIS and Deck.gl.

Acadence – Academic Attendance Decision Support System [Live] [GitHub]

Next.js 15, TypeScript, Supabase, Tailwind CSS v4, shadcn/ui, Docker

- Developed an academic decision support system using Next.js and TypeScript, enabling students to simulate attendance scenarios and prevent eligibility shortfalls.
- Engineered an anti-proxy verification pipeline utilizing GPS geofencing algorithms to strictly validate student location coordinates, preventing spoofed classroom check-ins.
